Derry Derajat

Software Quality Assurance, Software Development enthusiast
Kota Cilegon, Banten, Indonesia

Summary

Hi there! I'm Derry Derajat, a QA professional

specializing in crafting test executing cases, and bug reporting. Proficient in Jira, Trello, and spreadsheets for project management, as well as selenium, pytest, behave for automation, and SQL for database management. Let's connect for inquiries or collaboration!

Experience

PT Krakatau Information Technology Quality Assurance

December 2023 - July 2024 (8 months)
Cilegon, Banten, Indonesia

Test Documentation: Proficient in crafting comprehensive test plans, test cases, and detailed bug reports to ensure thorough quality assurance.

Tool Proficiency: Skilled in utilizing Jira, Trello, and Confluence for seamless document and project management, facilitating efficient collaboration and task tracking.

Automation and Database: Proficient in using Katalon for automation testing to streamline testing processes and enhance productivity. Additionally, adept at leveraging SQL for effective database management, ensuring data integrity and reliability.

Industry Experience: Demonstrated involvement in projects within the banking and healthcare sectors, providing valuable insights into industry-specific challenges and requirements.

Metrics Analysis: Capable of calculating bug resolution time and bug fix rate, enabling informed decision-making and continuous improvement initiatives.

CV. Utaya Makmur Sentosa

BISA AI Academy (PT BISA ARTIFISIAL INDONESIA)

Studi Independen (HACKER)

February 2022 - July 2022 (6 months)

Indonesia

1. The independent study program by Kemdikbud for 5 months was an enriching experience. During the program, I attended various learning sessions that provided insights into research methodologies, data analysis, and machine learning concepts.
2. I was responsible for creating daily, weekly, and final reports to track my progress throughout the program. These reports helped me reflect on my learning journey and identify areas that required improvement.
3. The program's highlight was completing a real-case project on machine learning modeling to predict bitcoin prices.

In summary, during the independent study program, I attended various learning sessions, created progress reports, and completed a real-case project on machine learning modeling. The program allowed me to enhance my skills and knowledge in the field of machine learning and work independently while also receiving guidance and support.

Universitas Serang Raya (UNSERA)

Computer Lab Assistant

September 2021 - January 2022 (5 months)

Serang, Banten, Indonesia

Responsibilities:

- Provided support to lecturers and practitioners in activities that involved the use of the computer lab at Universitas Serang Raya.
- Assisted users with technical issues, such as software installation, system configuration, and hardware troubleshooting.
- Maintained the cleanliness and organization of the computer lab, ensuring that all equipment was in good working condition.
- Kept a journal report on the use of the lab, documenting issues that arose, actions taken to resolve them, and recommendations for improvement.
- Collaborated with other lab assistants and IT staff to ensure that the computer lab was running smoothly and efficiently.
